Burger Blast – Gourmet Burger Restaurant Website

Website Description

Burger Blast is a modern gourmet burger restaurant website designed to provide customers with an easy and enjoyable browsing experience. The website will feature our diverse menu, including classic burgers, specialty creations, sides, and beverages. Visitors will be able to learn about our restaurant's story, explore mouth-watering photos, and check out our promotions. We aim to make the ordering process simple, intuitive, and visually appealing. Additionally, the site will be fully responsive to ensure smooth browsing on both desktop and mobile devices.

Data Storage, Manipulation, and Viewing

The website will store and manage multiple sets of data related to the restaurant's operations:
• Menu Items: Each menu item will include fields such as item name, description, price, image URL, and availability status.
• Promotions: A list of limited-time offers and special discounts will be managed by administrators.
• Customer Orders: When customers order online, their selections, quantities, and total cost will be stored.
• User Accounts: Administrators will have secure accounts to add, edit, or delete menu items and promotions. Customers can create accounts to save their order history and favorite items.
• Contact & Feedback: Messages submitted via the contact form will be stored for administrative review and follow-up.
